The new generation of drawing instruments is here! Unbreakable and durable

All drawing instruments of the Softie®Flex Professional Range are with precision stamped scales.

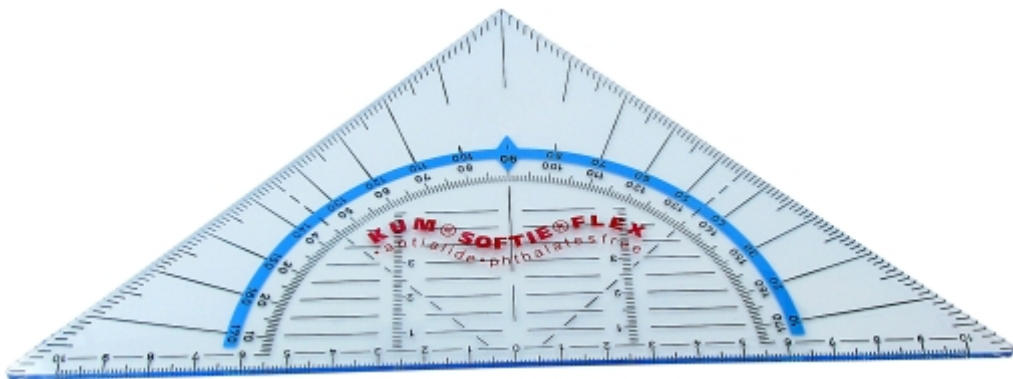

The special colour of these drawing instruments increases

the contrast and makes it easier to recognize the lines on the paper.

The extremely flexible and durable material is free of harmful phthalates and does not slip on paper surfaces.

The flexibility of the material also makes injuries on broken edges impossible.

KUM® Softie®Flex Professional 464 Triangle Protractor,
